Hey Cyber!!!!
📌💡❤️I learned the techniques by surfing the browser to solve the task and gained knowledge. The admin is also helping to get through the task if we ask for help. However, the program is going well and fully engaged.

Tasks covered in network security, vulnerability scanning and analysis and reward tasks. It's very interesting finally to develop hands-on skills.

Thanks for giving me this opportunity to learn in the task-based method. Hats-off :)💌 **#cybersecurity #intern #theredusers**
